

OPERATOR CHECKLIST / EV CHARGING

EV charging at forecourts: planning the complete visit

Plan an EV charging project around the driver journey, local accessibility requirements, power constraints and transparent economics.

Site / organization: _____ Date: _____

Reviewer: _____ Review period: _____

Review prompts

- ☐ Define expected customers and demand assumptions

- ☐ Walk the bay-to-controls-to-store route

- ☐ Confirm applicable local accessibility requirements

- ☐ Document connection and power-sharing constraints

- ☐ Separate charging and store economics

- ☐ Assign maintenance and fault ownership

- ☐ Test payment, charging, receipts and failure recovery

Evidence, unresolved actions and owners

A planning framework, not a site design certification. US Access Board recommendations are US-specific; check applicable local requirements.
